

What Can We Do With Scrap Tires?

Some of the many uses for scrap tires include:

- Commercial Products
- Civil Engineering Projects
- Crumb Rubber

Commercial Products

Scrap Tires are made into all sorts of popular commercial products like:

Purses	Shoes	Planters and Baskets	Floor Mats
			

Civil Engineering Projects

Scrap Tires are used in all sorts of Civil Engineering applications:

Rubberized Asphalt	Back Fill & Embankments	Septic Drainage Systems	Retaining Walls
			

Crumb Rubber

Scrap Tires are turned into ground crumb rubber, which has many uses, even making new tires:

Playground Mulch	Athletic Tracks	Automotive Parts	New Tires
			

There is no reason to ever burn a tire! To learn more about what you can do to oppose the proposed tire incinerator visit our website: www.stopburningtires.com
